

DEVELOPED FOR:

- Sensible Areas
- Industry
- Office

FEATURES:

- Monitor and wall-mountable
- Emergency fan for overheat protection
- Fully aluminium enclosure with a stainless steel cover
- 0db - no noise
- Power saving platform 2-20W
- 12-19V-DC device

DIMENSIONS & ENVIRONMENT

Color: Bursted silver
Material: Aluminium, Stainless steel
Dimension: 155*135*45mm
Operation Temp.: 0 - 40° C
Humidity: 10 - 95% @ 40° C

The NUC is designed for offices and areas where a small, but powerfull unit is needed. Especially when 0db silence is needed, areas with dust and areas where low voltage devices are needed.

The enclosure is fully alluminium with a shiny acrylic surface.

Cooling is fanless, but a strong emergency fan is placed centrally designed for overheat protection. With up to Intel i7 and only 20W it combines power with energy efficiency.
